

Sierra Crossing

The epic trek
you can do
in a week

A photo adventure story for your eReader

Sierra Crossing is the story and photographs that describe and capture the epic 70-mile crossing of the Sierra Nevada Mountain Range from east to west, as the first pioneers and trailblazers would have seen it.

Author Tom Stienstra and photographer Michael J. Furniss provide readers a seat at their nightly campfires, and with it, a rare glimpse of a little-known landscape and what it takes to experience it.

The trek starts from the flank of Mount Whitney, at 14,497 feet the highest point in the Lower 48, and then ranges over the Sierra Crest, down a 5,000-foot deep canyon, then up and over the Great Western Divide to Sequoia National Park at the foot of the western Sierra.

Sierra Crossing can be viewed with the Kindle and Nook, and with their computer apps. A special fixed-layout electronic book was created exclusively for the iBookstore.
